### DETAILED ACTION

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 2, 4 thru 7, and 9 thru 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Komoto et al. '824 B1. Komoto discloses (see, for example, FIG. 65) a light emitting device 100H comprising a lead frame (base) 110, fluorescent layer (fluorescent material containing layer) FL, light emitting element (light emitting diode element) 990, and resin (resin seal member) 140. The fluorescent layer is arranged on the backside of light emitting element. Also, see FIG. 69.

#### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2815

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Komoto et al. '824 B1. Komoto does not disclose said fluorescent material being an yttrium compound. However, it would have been obvious to one of ordinary skill in the art at the time of invention to use yttrium, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use (to obtain fluorescence) as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

#### *Response to Arguments*

5. Applicant's arguments with respect to claims 2, 4-27 have been considered but are moot in view of the new ground(s) of rejection.

#### *Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
